

# Hyeonjae Kim

Email:    hyeonjae.amo@gmail.com  
          hyeonjae@add.re.kr  
Website: hyeonjae.com

Research Officer at the Agency for Defense Development

## Education

|                                                                                |                          |
|--------------------------------------------------------------------------------|--------------------------|
| <b>Kyungpook National University (KNU)</b>                                     | Daegu, Republic of Korea |
| Bachelor of Science in Physics                                                 | Mar. 2020 – Feb. 2024    |
| Overall GPA: 4.11/4.3 (3.95/4.0)   Major GPA (71 credits): 4.19/4.3 (3.99/4.0) |                          |

## Research Experiences

|                                                                                                                                                                                                                                                                                                                                                                                                                               |                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Agency for Defense Development (ADD)</b>                                                                                                                                                                                                                                                                                                                                                                                   | Daejeon, Republic of Korea      |
| Research Officer (Supervisors: Dr. Sin Hyuk Yim, Dr. Sangkyung Lee)                                                                                                                                                                                                                                                                                                                                                           | Jun. 2024 – May 2027 (expected) |
| Research in atomic physics and quantum sensing                                                                                                                                                                                                                                                                                                                                                                                |                                 |
| <ul style="list-style-type: none"><li>• Designed and implemented an automated absorption spectroscopy system to characterize rubidium vapor cell properties</li><li>• Built and optimized a zero-field (SERF) optically pumped magnetometer for magnetic noise measurements</li><li>• Conducted magnetic-anomaly detection experiments and data analysis using a portable single-beam optically pumped magnetometer</li></ul> |                                 |

|                                                                           |                          |
|---------------------------------------------------------------------------|--------------------------|
| <b>Novel Applied Nano Optics Lab</b>                                      | Daegu, Republic of Korea |
| Research Intern (Advisor: Prof. Junyeob Yeo)                              | Jun. 2021 – Jun. 2022    |
| Project: Fabrication of a flexible photo-electrochemical cell using laser |                          |

|                                                                               |                          |
|-------------------------------------------------------------------------------|--------------------------|
| <b>High Energy Physics Lab (Moon Lab)</b>                                     | Daegu, Republic of Korea |
| Research Intern (Advisor: Prof. Chang-Sung Moon)                              | Jun. 2020 – Feb. 2021    |
| Developed momentum reconstruction algorithms for silicon detector simulations |                          |

## Publications

**UAV-based magnetic anomaly mapping of an undersea tunnel using a single-beam pulsed optically pumped magnetometer**  
Manuscript in preparation  
H. Kim, S. Lee, and S. H. Yim

**Novel sealing of glass-blown atomic gas cells using resistive heating wires**  
Manuscript under review  
S. H. Hong, Y. Lim, S. H. Yim, S. Lee, H. Kim, T. Jeong, and J. B. Nam

**Aging test of an atomic vapor cell with Al<sub>2</sub>O<sub>3</sub> wall coating on cubic glass**  
Applied Optics **64**, 7932-7937 (2025)  
H. Kim, T. Jeong, S. H. Hong, J. B. Nam, S. Lee, Y. Lim, and S. H. Yim

## Selected Conference Presentations

**Probing magnetic noise from portable sensor components using a zero-field optically pumped magnetometer**  
APS Division of Atomic, Molecular, and Optical Physics (DAMOP) Meeting, 2026 (scheduled)

**Experimental systems for spectroscopy and zero-field OPM with atomic vapor cells**  
KISTI-SNU Joint workshop (QNRC Joint Workshop), 2026 (invited)

## **Towards the development of a SERF magnetometer**

Korean Physical Society (KPS) Fall Meeting, 2025

## **Lifetime extension of rubidium vapor cells by $\text{Al}_2\text{O}_3$ coating**

APS Division of Atomic, Molecular, and Optical Physics (DAMOP) Meeting, 2025

## **Linear absorption spectroscopy in rubidium vapor cells: Applications in buffer gas measurement and lifetime estimation**

Korean Physical Society (KPS) Spring Meeting, 2025

## Honors and Awards

|                                                                                                                                                           |                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>Physics Alumni Association Award and Scholarship (Outstanding Graduate)</b><br>Department of Physics Alumni Association, Kyungpook National University | Feb. 2024                       |
| <b>2nd Prize, 2023 MiliTECH Challenge</b><br>Hosted by KAIST; Awarded by the Agency for Defense Development                                               | Dec. 2023                       |
| <b>2nd Prize, 2022 MiliTECH Challenge</b><br>Hosted by KAIST; Awarded by the Korea Military Academy (KMA)                                                 | Dec. 2022                       |
| <b>3rd Prize of Academic Conference</b><br>College of Natural Sciences, Kyungpook National University                                                     | Dec. 2021                       |
| <b>Dean's List: 3 semesters (2021-1, 2021-2, 2022-2)</b><br>College of Natural Sciences, Kyungpook National University                                    | Nov. 2021, Apr. 2022, Apr. 2023 |

## Grants and Scholarships

---

|                                                                                                             |                                 |
|-------------------------------------------------------------------------------------------------------------|---------------------------------|
| <b>National Science and Technology Scholarship</b><br>Korea Student Aid Foundation (KOSAF)                  | Mar. 2022 – Feb. 2024           |
| <b>Academic Merit Scholarship (Hyoseok Scholarship)</b><br>Kyungpook National University Alumni Association | Apr. 2022                       |
| <b>Academic Excellence Scholarship</b><br>Kyungpook National University                                     | Aug. 2020, Feb. 2021, Aug. 2021 |

## Other Research Outputs

---

|                                                                                                                                     |           |
|-------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Buffer Gas Pressure Estimation for OPAMs</b><br>Registered software; Korea Copyright Commission (C-2024-047156)                  | Dec. 2024 |
| <b>Rubidium Vapor Cell Lifetime Monitoring and Analysis Tool</b><br>Registered software; Korea Copyright Commission (C-2024-054414) | Dec. 2024 |

## Additional Experiences

---

|                                                                                                                                                                                                           |                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------|
| <b>Research Officer for National Defense (ROND)</b><br>First Lieutenant in the Republic of Korea Air Force<br>Selected as one of 20 research officers nationwide for STEM-based national defense research | Jun. 2024 – May 2027  |
| <b>Teaching Assistant, Classical Mechanics II (PHYS212)</b>                                                                                                                                               | Sep. 2023 – Dec. 2023 |
| <b>Teaching Assistant, Electromagnetism II (PHYS312)</b>                                                                                                                                                  | Mar. 2023 – Jun. 2023 |
| <b>International Student Tutor</b>                                                                                                                                                                        | Feb. 2022 – May. 2022 |

## Skills

---

Programming: Python, Wolfram Language (Mathematica)

Software: LabVIEW, SolidWorks, COMSOL Multiphysics
